EXPERIENCE

User Management System

Campuslands - 2024

The project, developed in Python, is a system that allows the administrator to create, read, update, and delete users, manage their statuses within the company, and organize aspects such as schedules and teaching assignments.

Kario Media

Campuslands - 2024

This project includes HTML and CSS design to enhance user navigation and interaction within a web application, incorporating loading animations and a responsive design for optimal viewing on multiple devices.

CampusBike

Campuslands - 2024

The project uses MySQL to manage information about user types, people, items, and sales, enabling data storage and retrieval through SQL queries and subqueries.

EDUCATION

Campuslands

Software Development Training
2024

High School Graduate

Monterrosales Homeschool Colombia
2023

TECHNICAL ABILITIES

- Python
- HTML & CSS
- JavaScript
- MySQL
- Java
